## How To Play

Each player gets one bingo board. The teacher or parent randomly calls out addition or subtraction problems from the answer key or callout cards. When four spaces are filled in a row, horizontally, vertically, or diagonally, shout "bingo!" The leader checks answers against the player's bingo.

There can be different variations of the game. Players can mentally solve problems or work as a group. It's a fun way to learn tough math!

Pro tips! Laminate boards for reuse or use markers. Use pennies or card stock for markers. Laminate the answer key or use a pencil to mark answers.
